Professional Summary

Motivated and results-driven **Trainee Web Developer** with practical experience building full-stack applications using the **MERN stack**. Skilled in **UI/UX design with Figma**, **responsive front-end development**, and **RESTful API integration**. Strong in **team collaboration**, **problem-solving**, and **effective communication**, with excellent **time management** to deliver quality results. Passionate about developing scalable web applications while continuously learning new technologies such as **React Native** and **Tailwind CSS**.

Technical Skills

- **Programming Languages:** JavaScript, TypeScript, SQL
- **Web Technologies:** ReactJS, Node.js, Express.js, HTML5, CSS, MongoDB, Tailwind CSS
- **Developer Tools:** Git, GitHub, Visual Studio Code, Postman, Figma
- **Concepts & Frameworks:** RESTful APIs, Responsive Web Design, State Management (React Hooks), Agile Development, Debugging

Education

- Bachelor of Information Communication Technology (Hons) 2023 – 2027
University of Colombo.
- O/L -A6, C3 | A/L -A1, B2 Technology Stream (Bandarwela Darmapala College) 2018 – 2021

Certifications

- Full-Stack Web Development (MERN) – SKYREK Academy
- Python for Beginners – University of Moratuwa
- Postman API Fundamentals Student Expert – Postman

Projects

I-Computers | MERN Stack (MongoDB, Express, React, Node.js) — Individual Project, 2024

- Developed a **full-stack e-commerce website** for selling electronic items (computers, laptops, accessories).
- Implemented **user authentication, cart, and order management** with **MongoDB** and **Express.js**.
- Built **responsive React.js pages** styled with **Tailwind CSS** and optimized performance using reusable components.

Portfolio Website | React.js, Tailwind CSS, JavaScript — Individual Project, 2024

- Built a **responsive portfolio website** to showcase projects and skills using **React.js** and **Tailwind CSS**.
- Applied **modern UI design**, smooth animations, and optimized performance for a professional user experience.

FOT Connect Mobile Application | Android Studio (Java, XML) — Individual Project, 2024

- Developed a **native Android app** for the Faculty of Technology to share **news, sports, and event updates**.
- Designed UI in **Figma** and implemented responsive layouts with **XML** for consistent, user-friendly navigation.

Student Mentoring System | MERN Stack — University Mini Project, 2024

- Built a full-stack web app connecting students and lecturers for mentoring sessions.
- Used ReactJS for front-end and Node.js/Express/MongoDB for backend data management.
- Integrated RESTful APIs and version control through GitHub.

Library Management System | PHP, HTML, CSS, JavaScript, MySQL — University Project, 2024

- Created a web system for managing books and users.
- Implemented CRUD operations and responsive layouts.
